DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-51, 56-85, 103, 117, 118, 123-126, 128-130, 132, 133, 136-142, and 145-149, drawn to a carpet product with a rebond foam layer, classified in class 428, subclass 95.

II. Claims 127, 131, 134, 135, and 143, drawn to a carpet product without a rebond foam layer, classified in class 428, subclass 85.

III. Claims 100-102 and 144, drawn to a textile article, classified in class 442, subclasses 221 and 370.

IV. Claims 52-55, 86-99, 104-116, and 119-122, drawn to methods of making a carpet product, classified in class 156, subclasses 82 and other various.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Groups I, III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions contain different layers (i.e., Group II without a rebond foam layer and Groups I and III with a rebond foam layer), thereby producing different effects.

3. Inventions of Group III and I are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd

paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an article other than a carpet product, such as impact resistance mat, pad, or body armor, and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Inventions of Group IV and Groups I, III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the products can be made by lamination with an adhesive other than by flame lamination. Additionally, the products can be made by forming the layer of rebond foam directly on a substrate, rather than by forming a self-sustaining layer of rebond foam and then laminating to said substrate.

5. Inventions of Group II and Group IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the methods of Group IV do not produce the article of Group II, since Group IV requires the presence of a rebond foam layer.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
